GUARANTEED TOUGH.

ANSI/ISEA 107-2010 STANDARD:

The American National Standard for High-Visibility Safety Apparel is a standard established by American National Standards Institute, Inc (ANSI) and the International Safety Equipment Association (ISEA).

Numerous workers, including construction, utility, police, emergency medical services, fire fighters, road workers, flaggers, and airport ramp workers are routinely exposed to the hazards of low visibility while on the job. This standard provides guidelines for the selection and use of high-visibility safety vests to improve worker visibility during the day, in low-light conditions and at night.

ANSI 107-2010 VISIBILITY REQUIREMENTS:

Class 2:

- For workers who require greater visibility under inclement weather conditions.
- When work backgrounds are complex.
- When tasks divert attention from approaching vehicle traffic.

Applications:

Roadway Construction, General Construction, Mechanical Construction, Utility Workers, Municipalities, and Railroad Workers

Class 2 Minimum Requirements:

Background Fabric	775 Square Inches
Reflective Material	201 Square Inches
Minimum Reflective Width	1.375 Inches

FR OVERVIEW:

ASTM F1506 Inherently Flame Retardant Material:

Standard Performance Specification for:

- Apparel for use by Electrical Workers exposed to momentary electric arc and related thermal hazards.

ASTM F1506 uses vertical flame test ASTM D6413 to determine flammability.

- Fabric must self extinguish in less than 2 seconds after flame has been removed.
- Char length must be less than 6 inches.
- No melting or dripping can be observed.

ASTM F1506 was developed for fabric intended for NFPA 70E standards and applications requiring arc rating greater than 4.0 cal.

NFPA 70E HRC Hazard Risk Category Levels:

HRC level is determined by the minimum amount of calories per square centimeter (ATPV or Cal/cm²) a treated garment must pass through with a 50% probability of a 2nd or 3rd degree burn occurring, thus the protective level of the treated clothing. The higher the ATPV, the higher the HRC level attained, the greater the protection.

RETAIL FRIENDLY PACKAGING

Hazard Risk Category	Common FR clothing at this level	Minimum ATPV(Cal/cm ²)
HRC 1	FR shirt and FR pants; Or FR coveralls; Single base layer of FR protection	4
HRC 2	FR under garments (undershirt, underwear), FR shirt, and FR pants; FR under garments, FR coveralls; 2 or more layers of FR protection	8
